In addition, the Bank considers external issues that could impact capital levels, which include regulatory and accounting changes, macro-economic conditions and outlook.

Credit risk

FNBB Credit loss rates are within the risk appetite of FNBB. These are managed within the Credit Risk Management Framework. Credit origination strategies are aligned to the FNBB macroeconomic outlook.

Market risk in the trading book

The interest rate risk asset class represents the most significant market risk in the trading book exposure as at 30 September 2023. The bank's Market Risk profile remained within risk appetite. Market Risk was managed within the Board acceptable limits.
